SUBJECT INDEX

Adsorption
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79
Adsorption et désorption de l'eau vapeur sur un polymère polyacrylique superabsorbant. Partie 1. Isothermes et chaleurs d'adsorption de l'eau vapeur sur le polymère (Bakass et al.) 205
Alloy
Relationships between the liquidus temperature and the formation of quasicrystalline phases in rapidly solidified Al–Cu–Mn alloys (Maâmar et al.) 45
Aluminophosphate
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79
Antifolate
Effects of temperature on the interaction of dihydrofolate reductase with some of its ligands (Gilli et al.) 137
Antimony compound
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179
Auxin
Thermal dissociation of metal–plant-auxin chelates (Sawhney et al.) 321

Barodilatometry
P–V–T measurements of polystyrene materials (Cuvelier et al.) 123
Benzene
Excess molar volumes of benzene with certain isomers of hexanol (Ortega et al.) 295

Cadmium
A Smith thermal analysis and DSC study of the In–Cd system (Horrocks et al.) 25
Calorimetry
Direct injection enthalpimetry and differential kinetic analysis—analytical and calorimetric possibilities (Boudeville, Burgot) 89
Chain length
Thermobarometric and differential scanning calorimetric study of the polymorphism of some even and odd paraffins (C_{26}, C_{27}, C_{40}, C_{60}) (Lourdin et al.) 99
Chelate
Thermal dissociation of metal–plant-auxin chelates (Sawhney et al.) 321
Chromium carbide
Calorimetry and e.m.f. techniques: how they compete and complete each other in determining the enthalpy and entropy of formation of Cr_3C_2 (Notin et al.) 55
Clay
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79
Co-ordination compound
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
18-Crown-6
Studies on the thermal behaviour and decomposition mechanism of complexes of rare earth(III) nitrates with 18-crown-6 (Yin et al.) 251
CRTA
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79

Decomposition
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
Degradation
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167
Denaturation
Thermodynamic parameters of β-lacto-

globulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
Density
Excess molar volumes of benzene with certain isomers of hexanol (Ortega et al.) 295
Desorption
Adsorption et désorption de l'eau vapeur sur un polymère polyacrylique superabsorbant. Partie 1. Isothermes et chaleurs d'adsorption de l'eau vapeur sur le polymère (Bakass et al.) 205
DIE
Direct injection enthalpimetry and differential kinetic analysis—analytical and calorimetric possibilities (Boudeville, Burgot) 89
Dissociation
Thermal dissociation of metal–plant-auxin chelates (Sawhney et al.) 321
DKA
Direct injection enthalpimetry and differential kinetic analysis—analytical and calorimetric possibilities (Boudeville, Burgot) 89
Docosane
Determination du diagramme de phases du système docosane (*n*-C_{22})–tétracosane (*n*-C_{24}): variation de l'enthalpie des mélanges en fonction de la température (Achour et al.) 187
DSC
A Smith thermal analysis and DSC study of the In–Cd system (Horrocks et al.) 25
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35
Differential scanning calorimetry and thermostimulated current spectroscopy for the study of molecular orientation in polymers (Bernès et al.) 69
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79
Thermobarometric and differential scanning calorimetric study of the polymorphism of some even and odd paraffins (C_{26}, C_{27}, C_{40}, C_{60}) (Lourdin et al.) 99
Thermodynamic parameters of β-lactoglobulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
P–V–T measurements of polystyrene materials (Cuvelier et al.) 123
Study of state transitions within multiple W/O/W emulsions using calorimetry (DSC) (Potier et al.) 145
DSC and Raman spectroscopy studies of high temperature structural phase transitions in $(C_3H_7NH_3)_2PbCl_4$ (Romain et al.) 157
A DSC study of the phase transitions in $(CH_3)_3NH[CdCl_3]$ (House, Jr., Dunbar) 213
Studies on the thermal behaviour and decomposition mechanism of complexes of rare earth(III) nitrates with 18-crown-6 (Yin et al.) 251
Application of the "shape-factors method" to purity analysis of compounds by thermal methods (Calvet et al.) 271
Thermoanalytical investigation of edible oils (Kasprzycka-Guttman, Odzeniak) 303
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
DTA
Differential thermal analysis under high hydrostatic pressures. Application to determination of phase diagram of semiconductors (Record et al.) 21
Relationships between the liquidus temperature and the formation of quasicrystalline phases in rapidly solidified Al–Cu–Mn alloys (Maâmar et al.) 45
Thermal analysis characterization of the reactions of metaphosphate glasses used as binders for oxides (Montagne et al.) 61
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179
Determination du diagramme de phases du système docosane (*n*-C_{22})–tétracosane (*n*-C_{24}): variation de l'enthalpie des mélanges en fonction de la température (Achour et al.) 187
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
DTG
Studies on the thermal behaviour and decomposition mechanism of complexes of rare earth(III) nitrates with 18-crown-6 (Yin et al.) 251
Dynamic calorimetry
Les principes théoriques de la calorimétrie dynamique (Zielenkiewicz) 1

EMF
Calorimetry and e.m.f. techniques: how they

compete and complete each other in determining the enthalpy and entropy of formation of Cr_3C_2 (Notin et al.) 55

Emulsion
Study of state transitions within multiple W/O/W emulsions using calorimetry (DSC) (Potier et al.) 145

Enthalpy
Calorimetry and e.m.f. techniques: how they compete and complete each other in determining the enthalpy and entropy of formation of Cr_3C_2 (Notin et al.) 55
Determination du diagramme de phases du système docosane (n-C_{22})–tétracosane (n-C_{24}): variation de l'enthalpie des mélanges en fonction de la température (Achour et al.) 187
Theory of a heat conduction calorimeter for scanning. Part 2. Non-uniform temperature and reactant concentration (Tanaka) 261

Entropy
Calorimetry and e.m.f. techniques: how they compete and complete each other in determining the enthalpy and entropy of formation of Cr_3C_2 (Notin et al.) 55

Enzyme
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35
Effects of temperature on the interaction of dihydrofolate reductase with some of its ligands (Gilli et al.) 137

Equation of state
P–V–T measurements of polystyrene materials (Cuvelier et al.) 123

Eutectic
A Smith thermal analysis and DSC study of the In–Cd system (Horrocks et al.) 25
Application of the "shape-factors method" to purity analysis of compounds by thermal methods (Calvet et al.) 271

Excess molar volume
Excess molar volumes of benzene with certain isomers of hexanol (Ortega et al.) 295

Explosives
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239

Fireproofing
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179

Gallium
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

Gallium sulphide
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

GC
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167

Gibbs energy
Calorimetry and e.m.f. techniques: how they compete and complete each other in determining the enthalpy and entropy of formation of Cr_3C_2 (Notin et al.) 55

Glass
Thermal analysis characterization of the reactions of metaphosphate glasses used as binders for oxides (Montagne et al.) 61

Glucosidase
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35

Heat conduction calorimeter
Theory of a heat conduction calorimeter for scanning. Part 2. Non-uniform temperature and reactant concentration (Tanaka) 261

Heat of vaporization
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

Hexanol
Excess molar volumes of benzene with certain isomers of hexanol (Ortega et al.) 295

HMX
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239

HPLC
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35

Hydrate
Thermal dissociation of metal–plant-auxin chelates (Sawhney et al.) 321

Hydration
Adsorption et désorption de l'eau vapeur sur un polymère polyacrylique superabsorbant. Partie 1. Isothermes et chaleurs d'adsorption de l'eau vapeur sur le polymère (Bakass et al.) 205

Hysteresis
A DSC study of the phase transitions in $(CH_3)_3NH[CdCl_3]$ (House, Jr., Dunbar) 213

Indium
A Smith thermal analysis and DSC study of the In–Cd system (Horrocks et al.) 25

Isothermal
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79

Kinetics
Les principes théoriques de la calorimétrie dynamique (Zielenkiewicz) 1
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239
Evaluation of the solutions of a standard kinetic equation for non-isothermal conditions (Mianowski, Radko) 281
Thermoanalytical investigation of edible oils (Kasprzycka-Guttman, Odzeniak) 303
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
Thermal dissociation of metal–plant-auxin chelates (Sawhney et al.) 321
Knudsen
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

Lactalbumin
Thermodynamic parameters of β-lactoglobulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
Lactoglobulin
Thermodynamic parameters of β-lactoglobulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
Lanthanon compound
Studies on the thermal behaviour and decomposition mechanism of complexes of rare earth(III) nitrates with 18-crown-6 (Yin et al.) 251
Lead compound
DSC and Raman spectroscopy studies of high temperature structural phase transitions in $(C_3H_7NH_3)_2PbCl_4$ (Romain et al.) 157

Metalloprotein
Thermodynamic parameters of β-lactoglobulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
Microcalorimetry
Effects of temperature on the interaction of dihydrofolate reductase with some of its ligands (Gilli et al.) 137
Microenvironment
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35
Model
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239
Theory of a heat conduction calorimeter for scanning. Part 2. Non-uniform temperature and reactant concentration (Tanaka) 261
MS
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167

N-body method
Les principes théoriques de la calorimétrie dynamique (Zielenkiewicz) 1
Non-isothermal
Evaluation of the solutions of a standard kinetic equation for non-isothermal conditions (Mianowski, Radko) 281
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311

Oil
Thermoanalytical investigation of edible oils (Kasprzycka-Guttman, Odzeniak) 303
Orientation
Differential scanning calorimetry and thermostimulated current spectroscopy for the study of molecular orientation in polymers (Bernès et al.) 69
Oxides
Thermal analysis characterization of the reactions of metaphosphate glasses used as binders for oxides (Montagne et al.) 61

Paraffin
Thermobarometric and differential scanning calorimetric study of the polymorphism of some even and odd paraffins (C_{26}, C_{27}, C_{40}, C_{60}) (Lourdin et al.) 99
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179
PET
Differential scanning calorimetry and thermostimulated current spectroscopy for the study of molecular orientation in polymers (Bernès et al.) 69
PETN
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239

pH
Thermodynamic parameters of β-lactoglobulin and α-lactalbumin. A DSC study of denaturation by heating (Relkin et al.) 111
Phase
Relationships between the liquidus temperature and the formation of quasicrystalline phases in rapidly solidified Al–Cu–Mn alloys (Maâmar et al.) 45
Thermobarometric and differential scanning calorimetric study of the polymorphism of some even and odd paraffins (C_{26}, C_{27}, C_{40}, C_{60}) (Lourdin et al.) 99
DSC and Raman spectroscopy studies of high temperature structural phase transitions in $(C_3H_7NH_3)_2PbCl_4$ (Romain et al.) 157
Phase transition
Differential thermal analysis under high hydrostatic pressures. Application to determination of phase diagram of semiconductors (Record et al.) 21
DSC and Raman spectroscopy studies of high temperature structural phase transitions in $(C_3H_7NH_3)_2PbCl_4$ (Romain et al.) 157
Phase transitions
A DSC study of the phase transitions in $(CH_3)_3NH[CdCl_3]$ (House, Jr., Dunbar) 213
Polymer
Differential scanning calorimetry and thermostimulated current spectroscopy for the study of molecular orientation in polymers (Bernès et al.) 69
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179
Adsorption et désorption de l'eau vapeur sur un polymère polyacrylique superabsorbant. Partie 1. Isothermes et chaleurs d'adsorption de l'eau vapeur sur le polymère (Bakass et al.) 205
Polystyrene
$P-V-T$ measurements of polystyrene materials (Cuvelier et al.) 123
Pressure
Differential thermal analysis under high hydrostatic pressures. Application to determination of phase diagram of semiconductors (Record et al.) 21
Protein
Effects of temperature on the interaction of dihydrofolate reductase with some of its ligands (Gilli et al.) 137

Raman
DSC and Raman spectroscopy studies of high temperature structural phase transitions in $(C_3H_7NH_3)_2PbCl_4$ (Romain et al.) 157

RDX
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239

Saponification
Direct injection enthalpimetry and differential kinetic analysis—analytical and calorimetric possibilities (Boudeville, Burgot) 89
Semiconductor
Differential thermal analysis under high hydrostatic pressures. Application to determination of phase diagram of semiconductors (Record et al.) 21
Sepiolite
A microcalorimetric comparison of the adsorption of various gases on two microporous adsorbents: a model aluminophosphate and a natural clay (Tosi-Pellenq et al.) 79
Shape-factors method
Application of the "shape-factors method" to purity analysis of compounds by thermal methods (Calvet et al.) 271
Smith analysis
A Smith thermal analysis and DSC study of the In–Cd system (Horrocks et al.) 25
Succinate complex
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311
Sulphur
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

TEM
Relationships between the liquidus temperature and the formation of quasicrystalline phases in rapidly solidified Al–Cu–Mn alloys (Maâmar et al.) 45
Tetracosane
Determination du diagramme de phases du système docosane (n-C_{22})–tétracosane (n-C_{24}): variation de l'enthalpie des mélanges en fonction de la température (Achour et al.) 187
Tetryl
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239
TG
Studies on the thermal behaviour and decomposition mechanism of complexes of rare earth(III) nitrates with 18-crown-6 (Yin et al.) 251

Theory of a heat conduction calorimeter for scanning. Part 2. Non-uniform temperature and reactant concentration (Tanaka) 261
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311

TGA
Thermal analysis of Sb_2O_3–chlorinated paraffin mixtures used for the fireproofing of polystyrene (Kaloustian et al.) 179

Thermobarometry
Thermobarometric and differential scanning calorimetric study of the polymorphism of some even and odd paraffins (C_{26}, C_{27}, C_{40}, C_{60}) (Lourdin et al.) 99
P–V–T measurements of polystyrene materials (Cuvelier et al.) 123

Thermo-oxidation
Thermoanalytical investigation of edible oils (Kasprzycka-Guttman, Odzeniak) 303

TNT
Obtaining kinetic data of energetic material decomposition by differential thermal analysis (Huang, Wu) 239

Transition
Study of state transitions within multiple W/O/W emulsions using calorimetry (DSC) (Potier et al.) 145

Transition metal compound
Kinetic analysis of non-isothermal decomposition of Fe^{2+}, Co^{2+}, Ni^{2+} and Cu^{2+} succinate complexes in a nitrogen atmosphere (Abd El-Salaam et al.) 311

Trimethylammonium cadmium chloride
A DSC study of the phase transitions in $(CH_3)_3NH[CdCl_3]$ (House, Jr., Dunbar) 213

TSC
Differential scanning calorimetry and thermostimulated current spectroscopy for the study of molecular orientation in polymers (Bernès et al.) 69

Urea
Study of state transitions within multiple W/O/W emulsions using calorimetry (DSC) (Potier et al.) 145

UV
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35

Vaporization
Vaporization chemistry in the gallium–sulfur system (Uram, Edwards) 221

Viscosity
Study of state transitions within multiple W/O/W emulsions using calorimetry (DSC) (Potier et al.) 145

XRD
Enzyme activity in self-evolving microenvironment. Differential microcalorimetry, UV spectrophotometry, HPLC and X-ray scattering studies (Chopineau, Ollivon) 35
Relationships between the liquidus temperature and the formation of quasicrystalline phases in rapidly solidified Al–Cu–Mn alloys (Maâmar et al.) 45
Determination du diagramme de phases du système docosane (n-C_{22})–tétracosane (n-C_{24}): variation de l'enthalpie des mélanges en fonction de la température (Achour et al.) 187

Zeolite
DTA–GC–MS coupling for the characterization of the volatile products resulting from the decomposition of organic templates occluded in zeolites (Soulard et al.) 167
